

AERIUM Analytics Inc. is currently seeking to fill the following position:

Job Title: UAV Pilot

Location: Calgary, Alberta or Edmonton, Alberta

Reports to: VP Operations

Purpose: A UAV Pilot is responsible for completing ground and flight operations including mission planning, briefing, execution, debriefing, aircrew field supervision, and ground and flight safety. Serves as Pilot-in-Command (PIC) of assigned Unmanned Air Vehicle(s) (UAV).

This is a permanent full-time position with competitive compensation and benefits package.

This position will be required to travel regularly for periods up to three weeks. Whenever not travelling for projects, hours and work location are flexible.

Training will begin in April prior to project start in late April early May.

Knowledge, Skills & Abilities:

- Model Aircraft experience
- Quadcopter experience
- Safety first attitude
- Proficient in Microsoft Office Applications
- Strong communication skills
- Able to work under pressure
- Be able to pass Transport Canada background check
- Valid Passport and Class 5 Drivers License
- This position is subject to drug and alcohol testing

Bonus Skills:

- Photogrammetry Experience (Software like Pix4D, PhotoScan or ReCap)
- LiDAR Experience
- Transport Canada approved UAV Ground School Training
- Valid ROC-A (Restricted Radio Operators Certificate – Aeronautical)
- H2S Alive, WHMIS, Wildlife Awareness certifications

Please send your resume and cover letter to info@aeriumanalytics.com. We thank all applicants for their interest; however, only those candidates selected for further consideration will be contacted. Due to Transport Canada requirements, UAV pilots must be 18+ years old.
